

1 - Outputs A as it is number 1 in the string

20 - outputs T as it is still within 1 -26

1000 - as it is not in the range, the program outputs invalid output

5000000000000 - I get an error as the number is way too big for the program

-5000000000000 - same error as above, too big

12, 354 - no error, it outputs invalid input, number is outside of range

789.543 - I get an error as it's a float number, and we are using only int

-0 - invalid input, number is outside of acceptable range
