

1. We used long because it can hold more data than int can

It is declared with max+1 because that is what we need in order for the program to calculate and run correctly

2. do {

Code code code code

} while (true)

3. We use min because this program is meant to be reversed, min and max are reversed on purpose
4. We use min because this program is meant to be reversed, max and min are reversed on purpose
